EDUCATION

- Dr. A. P. J. Abdul Kalam Technical University, Lucknow** Ghaziabad, Uttar Pradesh
B.Tech in Computer Science; CGPA: 8.30 (link to result) Jul 2019 – May 2023
 - Courses: Data Structures and Algorithms, Analysis Of Algorithms, Artificial Intelligence, Machine Learning.

SKILLS SUMMARY

- Languages:** Python, C, C++, C#, SQL, JavaScript, Dart, Bash
- Frameworks & Libraries:** PySpark, TensorFlow, PyTorch, Keras, scikit-learn, Django, Flutter, LangChain, ML-Agents
- Expertise:** NLP, Computer Vision, Machine Learning, Deep Learning, Data Science, Web & Android Development, Web Scraping, Reinforcement Learning, Azure ML
- Tools:** Jupyter, PyCharm, Google Colab, Power BI, VS Code, Git, Docker, MySQL, MongoDB, OpenStack, AWS, Google Cloud, OpenAI APIs
- Courses:** DSA, DBMS, Compiler Design, Web Design, ML Techniques, Big Data, Software Project Management

EXPERIENCE

- MAQ Software** Noida, India
Data Scientist Jul 2023 – Current
 - Built an **AI-driven data alerting platform** for **Microsoft**, integrating a **natural-language chatbot** for data insights with **prompt-based rule creation** to detect **anomalies and metric deviations** and trigger notifications on data refresh.
 - Designed **scalable data pipelines** using **Spark, Delta Lake, and Databricks**, reducing data processing time by **40%** and enabling near real-time survey insights extraction.
 - Developed a **production-ready predictive machine learning pipeline** in partnership with **PepsiCo**, solving distinct **regression and classification** problem statements to model **units sold** and **customer purchase likelihood** across products and vendors.
 - Optimized forecasting models through **feature engineering, hyperparameter tuning, and cross-validation**, applying algorithms such as **ARIMA, SARIMAX, Prophet, Exponential Smoothing (Holt-Winters), Gradient Boosted Trees (XGBoost, LightGBM), and LSTM/GRU models**, achieving a **10–15%** reduction in forecasting errors (MAE, RMSE).
 - Collaborated with global clients including **PepsiCo, Staples, Kimberly-Clark, and Microsoft** to gather functional and technical requirements for **AI assistant chatbots**, translating business use cases into scalable **machine learning solutions**.
 - Reengineered **time series forecasting frameworks** for multiple retailers, improving scalability and adaptability and reducing forecasting model maintenance effort by **25%**.
 - Orchestrated **AI agent integrations** using **LangChain, GPT APIs, and custom API-wrapped functions**, enabling phone-based interactions and increasing sales engagement and CRM task automation efficiency by **25%**.
- Oxygen 2 Innovation** Noida, India
Machine Learning Engineer Mar 2022 – Jul 2023
 - Developed **computer vision algorithms for autonomous kamikaze drones**, leveraging **YOLOv5, Faster R-CNN, and ResNet** to improve target recognition **accuracy by 35%** and enhance mission success rates.
 - Enhanced AI-based Ground Control Stations for **HALE drones**, implementing **Reinforcement Learning (DQN, PPO)** to increase operational efficiency and reduce mission planning **time by 40%**.
 - Designed a **real-time AI-based stress detection system**, leveraging **Random Forest, SVM, and LSTM with sensor fusion** to achieve **90%+ accuracy**, contributing to improved mental health monitoring.
 - Built a fighter airplane simulator, creating a high-fidelity training environment with **ML-Agents, CNN-based perception models, Python, C++**, significantly improving pilot training outcomes.

CERTIFICATIONS

- Microsoft Certified: Fabric Analytics Engineer Associate (Credential)
- Analyze Data to Answer Questions by Google (Credential)
- Career Essentials in Generative AI by Microsoft and LinkedIn (Credential)
- Career Essentials in GitHub Professional Certificate (Credential)
- Docker Foundations Professional Certificate (Credential)

SCHOLASTIC ACHIEVEMENTS

- Qualified to the second round of Mehar Baba's Swarm Drone Competition, organized by the Indian Air Force.
- Secured 425 State Rank in IOS Maths Olympiad (2021).
- Global Rank 916 in Biweekly Contest (2023).
